## Solar Adapter Guide
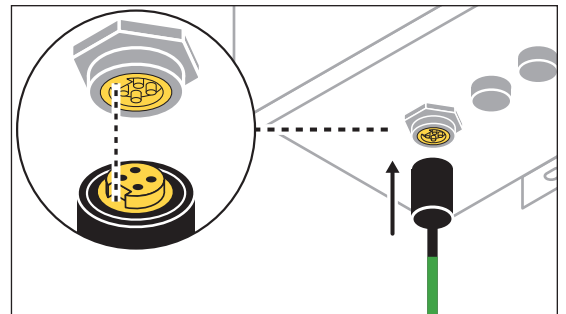

Adapting to Post-2023 Camera Models

STEP 01

Locate the yellow input port on the camera enclosure or control box.

STEP 02

Align notches and plug the yellow bulkhead end of the adapter cable into the camera or control box port. Gently hand tighten to screw connector into input.
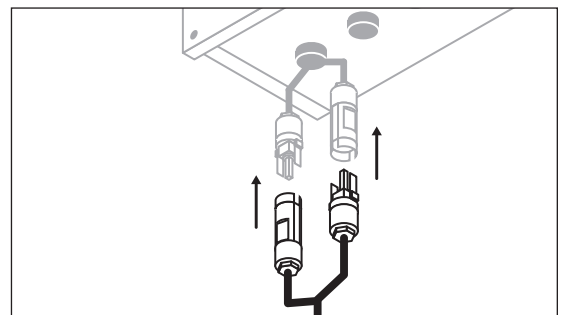

STEP 03

The other end of the cable has two connectors, one male and one female. Plug the adapter cable's ends into their respective connectors coming from the extension cable, male to female.
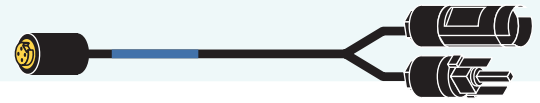

STEP 04

Locate the connectors coming from the power converter box or solar battery enclosure, then plug the extension cable's ends into their respective connectors, male to female.
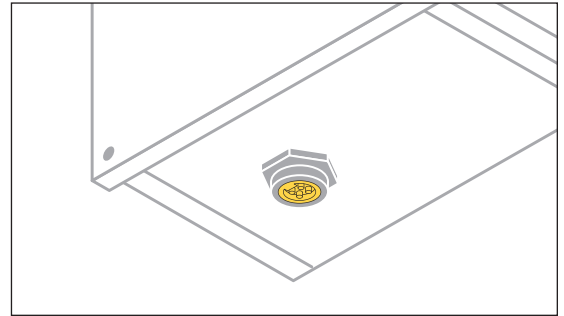

Solar Adapter Guide
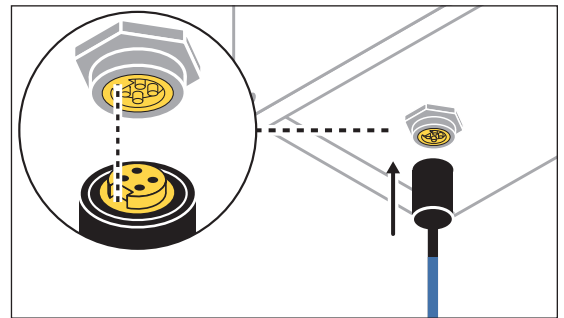

Adapting to Pre-2024 Camera Models

STEP 01

Locate the yellow input port on the power converter box or solar battery enclosure.

STEP 02

Align notches and plug the yellow bulkhead end of the adapter cable into the power converter box or solar battery enclosure port. Gently hand tighten to screw connector into input.

STEP 03

The other end of the cable has two connectors, one male and one female.

Locate the connectors coming from the camera or control box, then plug the adapter cable's ends into their respective connectors, male to female.
